

■ SUBJECT INDEX

A		D	
Amusement ride applications	5	Decimal/fraction/metric conversion table	139
APPENDIX INFORMATION		DESIGN AND SELECTION	
Chain and sprocket index	148-150	Applications beyond scope of catalog selection	129
Engineering information	139-147	Chain selection procedures	
Subject index	151-152	Conveyor chain selection	119-129
B		Polymeric chains	130-132
Bucket flight wings	101	Elevator chain selection	1328
Buckets, elevator	99-102	Drive chain selection	103-118
C		Heat treatment – see HEAT TREATMENT heading	
Cast and chill iron sprocket hubs	81-82	Double flex chains, metal	70-71
CAST CHAINS		Double flex chains, polymeric	67-68
Attachments	56-58	DRAG CHAIN	
Combination chain	53-55	Center distance	140
Drag chain	48-49	Chain length	141
Mill chain	47	Cast chains	48-49
Pintle chain	49-51	Welded chains	41
Roof-top chain	52	Drive chain selection, Engineered class	103-118
Transfer chain	53	DRIVE CHAINS	
Catenary	141-142	3100 series – chain listings	35
Center distance calculation, minimum	140-141	Drive chain listings	34-35
CHAIN ACCESSORIES		General information	30-32
Elevator buckets	99-102	Offset sidebar drive chains	34
Polymeric buckets	99-100	Sealed joint drive chains	35
General information	99	Selection procedures – using tables	103-118
Bucket and flight wings	101	Selection tables	110-118
Bucket listing	100	Service factors	108-109
Segmental rim sprockets & traction wheels	90-93	Straight sidebar chains	35
General information	90	System design considerations	103
Split hub bodies	92	Drivemaster	33, 39
Solid hub bodies	91	DROP FORGED	
Cast rims	93	Attachments	60-63
Sprockets	75-89	Chain listings	59
Cast sprocket listing	83-88	E	
Fabricated steel sprockets	79-80	ELEVATOR AND CONVEYOR CHAINS	
Cast sprocket hubs – solid	81	Attachments	15-29
How to order	78	Cast chains	47-58
Cast drum flanged traction wheels	89	Chains with rollers	10-13
Selection and specification	76-78	Chains without rollers	14
Octagonal tail wheels	80	Conveyor selection procedures	119-129
Sprocket types	75	Corrosion-resistant chains	73
Fabricated split hubs	79	Double flex chain sprockets	70
Sprockets and traction wheels	75	Double flex chains, metal	70-71
Cast traction wheels	89	Double flex chains, polymeric	67-68
Cast sprocket hubs – split	81	Drop forged chains	59-63
Fabricated solid hubs	79	Elevator chain pull calculation	128
Chain breakers	137-138	Live roller conveyor chains	69
Chain interchange	74	Low friction (LF) bushed chains	72
Chain length, minimum	141	Polymeric chains	64-68
Chain and sprocket index	148-154	Welded steel chains	36-46
Chordal action	106	Elevator buckets	99-102
Combination chain	53-55		
Corrosion-resistant chains	73		

■ SUBJECT INDEX

ENGINEERED STEEL CHAIN			
Connecting and Disconnecting	133-134		
Conveyor and elevator chain	10-29		
Design information – see DESIGN AND SELECTION			
Expansion temperature and color	147		
Lubrication materials and processes	135-136		
Engineering constants	145		
G			
Guide to welding attachments	42		
H			
Hardness and strength comparison tables	146		
HEAT TREATMENT			
Sprockets	76		
Welded steel chain options	36-37		
Heavy duty drag chain	41		
Hollow pin chain	69		
H-type mill, cast	47		
H-type mill, polymeric	65		
I			
IDLER WHEELS			
Cast drum flanged	89		
Polymeric	98		
Interchange – chain	74		
K			
Keyways, standard dimensions	140		
L			
Linkmaster	138		
Live roller conveyor chains	69		
Low friction (LF) bushed chains	72		
M			
MAINTENANCE INFORMATION			
Assembly/disassembly tools	137-138		
Connecting and disconnecting chain	133-134		
Conveyor chain maintenance	136		
Drive chain maintenance	135		
Material characteristics, conveyed materials	143-144		
Metric/decimal/fraction conversion table	139		
Mill chain, cast	47		
P			
Pintle chain	49-51		
POLYMERIC CHAINS AND ACCESSORIES			
Application information	130-132		
Catenary sag	131		
Double flex chains	67-68		
Double-flanged polymeric idlers	98		
Environmental factors	130		
Maintenance information	132		
Materials	130		
Sprockets and idler wheels	94-98		
Sprocket features/benefits	94		
Straight running chains	64-65		
Straight running – attachments	66		
Wear strips	130-131		
Power and cycle calculations	141		
R			
Roof-top chain	52		
S			
S Series drop forged chain	59		
Segmental rim sprockets and traction wheels	90-93		
Selection procedure			
– see DESIGN AND SELECTION heading			
SPECIAL APPLICATION CHAIN			
Amusement rides	5		
Bottling and beverage industry	7		
Cane sugar and beet processing	8		
Distribution and material handling	9		
Draw bench and steel industry chains	6		
Food processing	8		
Grain handling chain	4		
High performance elevator chains	4		
High sidebar chain	9		
In-floor conveying chain	6		
Reclaimer and barge/ship unloading chains	7		
Sprocket/chain index	148-150		
Sprocket pitch diameters	139		
Sprockets, see CHAIN ACCESSORIES			
Sprockets traction wheels, see CHAIN ACCESSORIES			
Strength of materials	146		
T			
Transfer chains	52		
W			
WELDED STEEL CHAIN			
Attachments	43-46		
Drag chain	41		
Drag chain head sprockets	80		
Drag chain sprockets	80		
Drag chain tail sprockets	80		
General information	36-37		
Heat treatment processes	36-37		
Heavy duty drag chain	41		
Narrow series	38		
Reverse barrell wide mill drag chain	40		
Welding instructions	42		
Wide series	39		
Welding instructions, welded and chain	42		
Weights and conveying characteristics of materials	143-144
